

SOULAIMA GOURANI

Mrs. Soulaima Gourani is one of the two female business thinkers who made it in Nordic Thinkers 20 list. It is hard to believe her math teacher told her she will not get very far in her life. Tough words to a Moroccan-origin 13-year old girl.

After only two years from hearing the harsh words about not getting far in her life, Soulaima moved out from her parents, as she decided it would be better for her. Rather than going out, buying expensive purses or drinking with friends, Soulaima ran her own household. At the age of 15, that is. She repeatedly mentions her passion for learning, and tries to find her way to be with people who are superior to her – who have more knowledge and skills. *“It is the only way to develop myself, I can learn from others.”*
